

Project Plan (1 Page)

- **Scope:** The Scholarship Grantees Tracking System is a VB.NET MDI application, it is developed to help Local Government Units (LGUs) or other institutions in successfully manage their scholarship programs. This SGT System uses MS Access database to ensure its efficiency, transparency, and accuracy in terms of systematically record and monitor scholarship details, grantee information, and stipend pay-out. The system has CRUD functionalities for all tables, an advanced search for releases, and report printing. This system is a user-friendly and innovative solution which is designed to make scholarship management simple. With its nice interface and good features, it makes administrators handle scholarship records with ease and correctness. It promotes advanced technology and service, making complex tasks solves turns more manageable.
- **Forms:** List the forms you created.
 - FrmMain (MDI Parent)
 - FrmProgramsList & FrmProgramEdit (for Scholarship Programs)
 - FrmGranteesList & FrmGranteeEdit (for Grantees)
